A preventive maintenance (PM) for an oil change is both time-based and meter-based. It is scheduled to generate a work order every 3,000 miles or 3 months. The estimated next due date on the Time-based sub-tab is January 30, based on average time elapsed between previous oil changes. The estimated next due date on the Meter-based sub-tab is January 15, based on average mileage. What is the next due date for this PM?

- A. The next due date for this PM should be January 30, the later of the two dates.
- B. The next due date for this PM should be January 15, the earlier of the two dates.
- C. Two work orders will be generated, one on January 15 and the other on January 30.
- D. A PM cannot have both time-based and meter-based frequency at the same time; therefore no work order will be generated.

Select the best answer.

Answer: B

A solution advisor is performing a demonstration of IBM Maximo Asset Management V7.1 (IMAM) features to a client where Maximo 4.1.1. is already implemented. The customer wants to know how custom fields are handled during the upgrade process.

Which response should be provided to the customer?

- A. Custom fields cannot be upgraded to IMAM.
- B. The IBM Upgrade Utility will automatically create the Custom columns in IMAM.
- C. The Custom fields will be created in IMAM by using the Application Designer and Database Configuration.
- D. Once the upgrade is complete, the database administrator will create the extra columns in IMAM by using DB scripts.

Select the best answer.

Answer: C
